EXPERIENCE

Microsoft | User Experience Designer II

May 2017 - Present

Word

Specialize in Word's core UX. Regularly represent Word's design in cross-apps projects.

- Designed and delivered several cross-apps features such as the task pane management system.
- With a data-driven approach, worked closely with various PMs and data scientists to redesign Word's commanding UI including the ribbon, floatie, and contextual menu.

Sway

Lead designer for Sway's authoring experience.

- Worked in a triad setting with a PM and Eng partner to define goals and MVPs for Sway V2 refresh. Designed and prototyped various visionary concepts for management.
- Interaction and visual design for many Sway features. Delivered many quality design solutions to improve Sway's authoring and consumption experience.
- Planned and executed many online user studies and in person one to many interviews.

Google | User Experience Design Intern

May 2016 - Sep 2016

UX design intern in Google Shopping.

- Designed and delivered the end to end post-purchase experience for TPLA (Transactable Product Listing Ads).
- Explored various designs to improve the experience for the Price Drop Card in Google Now.
